

Pedal Operated Potato Peeler

Utility

The pedal operated potato peeler has been especially developed for small scale entrepreneurs where electricity is not available. The perforated stainless steel drums having abrasions on their inner surfaces during rotation remove skin of potatoes as in manual peeler.

Specifications & Performance results		
Power source	:	Manual
Weight, kg	:	75
Cost, Rs.	:	17,000/-
Labour requirement, man-h/t	:	5.3
Output capacity, kg/day	:	188
Cost of operation, Rs/tonne	:	300/-

Benefits over conventional/traditional practices

- Enhanced capacity compared to work without machine.

Design: ICAR-CIAE, Bhopal

Commercialization Status: Commercialized
